Database

Most information stored by your Octopus Deploy server, including projects, releases, deployments and so on, is stored in a Microsoft SQL Server database.

Server name: (local)\SQLEXPRESS Refresh

Authentication: Windows Authentication

Database: Octopus Refresh

Note: When running the Octopus Deploy service as Local System, Windows Authentication can be used only if the SQL Server instance is hosted on the same machine. To host SQL Server remotely, use SQL Server Authentication, or run the Octopus Deploy service as a custom account.
